ABOUT US

PHINMA Property Holdings Corporation (PHINMA Properties) is a real estate developer that has a well-established reputation as one of the pioneers in affordable housing options in Metro Manila. As a subsidiary of leading Philippine conglomerate, PHINMA Corp., the company creates residences that cater to a broader market of Filipino families, combining affordability, convenience, and quality in well-built medium-rise condominiums.

With almost three decades of building homes, PHINMA Properties has carved a viable niche in the country's housing industry. By utilizing the internationally-recognized construction method of "cast forms" (Buhos), the company was able to set a standard for low-cost housing—units are able to be constructed faster, sturdier and with less the cost. The same technology allows PHINMA Properties' developments to have larger living spaces compared to industry standards. All of this is achieved through ethical business practices, in accordance with Philippine government standards. PHINMA Properties developments are not only quality-assured, but also built with utmost integrity.
